VelveTop™
P R O D U C T S

As Always, We have Got You Covered

For more than 30 years, VelveTop™ has been Long Island's only manufacturer and distributor of pavement maintenance products, and has been at the forefront of pavement technologies and innovations in the New York Metropolitan area. Our family owned and operated business prides itself on being THE household name when it comes to all of your pavement maintenance needs – a tradition we look forward to continuing well into the future.

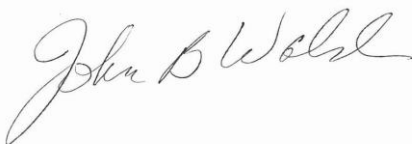

Five years ago, VelveTop™ began researching green technologies with the goal of providing the people of Long Island with several options in the maintenance and preservation of the more than 200 Million square feet of asphalt surfaces we have in Suffolk and the surrounding counties.

Three years ago, we acquired the rights to manufacture and sell SealMaster® brand pavement products. SealMaster® is recognized nationally for the manufacture and sales of asphalt pavement products and equipment. We are excited to introduce this new line of products. Through these manufacturing rights VelveTop™ can now offer a wide variety of asphalt-based sealcoats that are recognized for their deep rich color, quality, durability and odor-free application. As always we will continue to offer the largest supply of sealcoating materials and products, equipment and parts, tools and accessories and sport coatings in the industry.

We are confident that our coatings will continue to preserve and extend the life of our asphalt well into the future, as they have for the past three decades.

We thank you for being a part of the VelveTop™ community.

Sincerely,

John B. Walsh
President
